

Install Extension

FAST METHOD 1 (RDP and CMD)

1. Connect to RDP

You can use any software

2. Go to command line utility (CMD) and run the following command:

plesk bin extension.exe --install-url "https://www.flexservices.app/ext/setup-flex-firewall-manager.zip"

1. Then go to Plesk > Extensions > My Extensions

METHOD 2 (RDP and PLESK)

2. Connect to RDP

5	Remote Desktop Co	onnection	-		X
Remote Desktop Connection					
Computer:	Example: computer.fabrikam.com	m v	·		
User name:	None specified				
The computer name field is blank. Enter a full remote computer name.					
Show O	ptions	Connect		Hel	p

You can use any software

3. Go to Plesk Config Path:

(C:) → Program Files (x86) → Plesk → admin → conf 🗸 🗸 💍

C:\Program Files (x86)\Plesk\admin\conf

- 4. Create or edit panel.ini file
- 5. Add this code lines:

[ext-catalog] extensionUpload = true

- 6. Save file and close RDP
- 7. Go to Plesk > Extensions > My Extensions

Now you can see a new button "Upload Extension". Click and select ZIP setup.

https://www.flexservices.app/ext/setup-flex-firewall-manager.zip

8. Then go to Plesk > Extensions > My Extensions

Flex Firewall Manager

METHOD 3 (PLESK)

1. Go to Plesk > Extensions Catalog

Search "Panel.ini Editor" extensión and install it

- 2. Go to Panel Editor > Edit tab
- 3. Add this code lines:

[ext-catalog] extensionUpload = true

- 4. Save form
- 5. Go to Plesk > Extensions > My Extensions

Now you can see a new button "Upload Extension". Click and select ZIP setup.

https://www.flexservices.app/ext/setup-flex-firewall-manager.zip
